Find the right fit for your child's feet.
Just follow these three easy steps.

1. Simply line up your child's heels and insteps to the dotted lines. Gently press on your child's feet to make sure they're flat and that the toes aren't curled. Tip: Try tickling the bottoms of their feet to get them relaxed and easy to measure.

2. Measure and mark in centimetres, draw a line in front of their longest toes. Allow 0.5 – 1cm extra when selecting your shoe size, more if child wears thick socks with shoes. Don't worry, it's common to have one foot larger than the other, so be sure to use the longer foot to measure.

3. Use the converter bellow to determine your child's shoe size. Remember to round up if your child's size falls in between the 'Foot Size' numbers.

Note:

Your child's feet are constantly growing so measure them every two to three months.
